

Kenworth T470 Adds Second Horsepower Rating

KIRKLAND, Wash. – Kenworth Truck Company has added a second horsepower rating for the new Kenworth T470 model.

The Kenworth T470 may now be ordered with the 9-liter Cummins ISL engine with 365 hp and 1,250 lb-ft of torque. Previously, the T470 was available with only the Cummins ISL with 345 hp and 1,150 lb-ft of torque.

The T470 offers Kenworth performance and durability for snowplow, dump, mixer, winch, refuse, and other heavy front-axle vocational and municipal applications. The T470 has a gross vehicle rating (GVW) ranging from a heavy Class 7 vehicle at 33,000 lbs. up to a light Class 8 truck at 68,000 lbs.

The vehicle offers full parent rail extensions, delivering maximum resistance to bending moment (RBM) from one end of the rail to the other. Front axles are rated from 12,000 to 22,000 lbs., single rear axles from

21,000 to 26,000 lbs., and tandem rear axles from 40,000 to 46,000 lbs.

Kenworth Truck Company is the manufacturer of The World's Best® heavy and medium duty trucks. Kenworth is an industry leader in providing fuel-saving technology solutions that help increase fuel efficiency and reduce emissions. The company's dedication to the green fleet includes aerodynamic trucks, medium duty diesel-electric hybrids, liquefied natural gas trucks, and the Kenworth Clean Power® no-idle system. This year, Kenworth became the first truck manufacturer to receive the Environmental Protection Agency's Clean Air Excellence award in recognition of its environmentally friendly products. In addition, Kenworth is the recipient of the 2009 J.D. Power and Associates awards for Highest in Customer Satisfaction for both Over the Road Segment and Pickup and Delivery Segment Class 8 Trucks, and for Heavy Duty Dealer Service.
