KENWORTH
THE WORLD'S BEST

T270   T370
Class 6   Class 7
Do you want a medium-duty truck that will most likely outlive the body you put on it? Then there is some very good news: The Kenworth T270 and T370 are two trucks engineered and built to do just that. Designed and built with your long-term business goals in mind.

No matter which model you select, you start with a versatile, rugged and reliable chassis capable of tackling the toughest jobs you’ve got. Then add advantages like contemporary aerodynamic styling, great visibility, excellent maneuverability, a driver-pleasing premium interior and quick single point daily maintenance checks. These are trucks you can count on – day in, day out.

The T270 is a true Class 6 vehicle, rated at 26,000 lbs GVW. Available as a straight truck, it can be configured for non-CDL operation to broaden your pool of drivers.

The Class 7 T370, as a straight truck or tractor, offers a GVW range from 26,001 to 33,000 lbs. The T270 and T370 are also available as a diesel-electric.

Custom-built from the ground up for your specific application, you can choose manual or automatic transmissions, air or hydraulic brakes and select from components by proven North American manufacturers.

Kenworth’s legendary conventional cab – a strong and quiet environment unmatched in the industry for its longevity and comfort – is part of the package. The quiet, fully-trimmed interior is doghouse-free to increase floor space and operating convenience. The wrap-around instrument panel offers large, easy-to-read glare-free gauges and quick access to driver controls. Standard features include power door locks and passenger-side electric window.
The T270 and T370 are full of convenient service features. The hood tilts a full 90 degrees for wide-open access to the engine and all service points. Both models are equipped with the PACCAR PX-7 engine rated up to 325 hp and 750 lb-ft of torque, or with the optional PACCAR PX-9 engine rated to 350 hp and 1,150 lb-ft of torque. The PACCAR PX-7 offers the highest horsepower to weight ratio of any engine in the industry. The optional PX-9 with up to 1,150 ft-lb of torque is the right choice for more demanding applications. Both engines offer extended service intervals, advanced fuel efficiency and a standard of reliability you’ll measure in peace of mind.
Perhaps you’d prefer to focus your attention and resources on your core business, save interest expense and improve cash flow. PacLease offers a number of truck rental and leasing programs that can be tailored to fit your operating requirements precisely. www.paclease.com

Start with a lender who understands your business. PACCAR Financial has served owner-operators and fleets for nearly 50 years, matching individual requirements with customized financing packages at attractive and competitive rates. Financing has never been this easy. www.paccarfinancial.com

OF COURSE YOU HAVE CHOICES. THIS IS YOUR KENWORTH.

Your medium-duty Kenworth is available with job-specific and appearance options. Here are just a few of them.

HEAVY-DUTY SUPPORT WHenever — AND WHEREVER — YOU NEED IT

The reliability and moneymaking potential of your business relies on the dependability of your support system – another great reason to invest in a Kenworth.

The minute you take delivery of your Kenworth, you gain 24/7 access to one of the most extensive and reliable parts and service organizations in the trucking industry. People who know your truck inside out and can show you how to lower operating expenses, maximize uptime, optimize truck performance and profit from your investment. Comprehensive preventive maintenance programs, expedited servicing, complimentary roadside assistance and cost management service cards are among the valuable programs available through Kenworth PremierCare®.
