

KENWORTH
TRUCKTECH+

KENWORTH.
The World's Best.

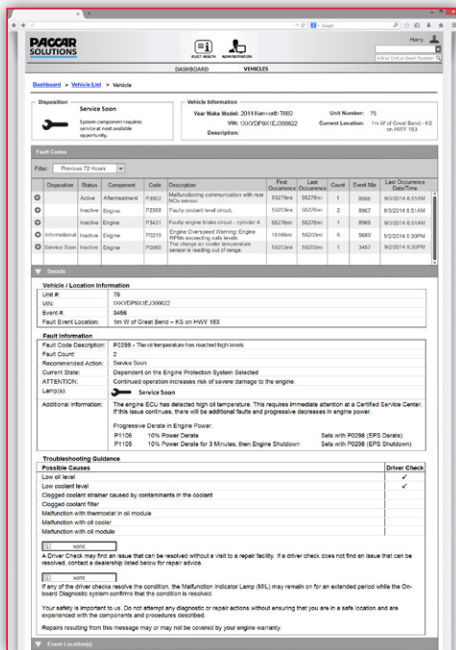

ACCELERATE DIAGNOSTICS, EXPEDITE REPAIRS AND MAXIMIZE UPTIME

Running your business just became a whole lot easier, more productive, more efficient and more profitable. Introducing KENWORTH TruckTECH+. An innovative new technology that helps you diagnose and solve potential problems — before they impact your operation. Standard in every new Class 8 Kenworth with a PACCAR MX-13 engine, the system delivers:

Immediate recommended action is provided to the operator through the driver performance center.

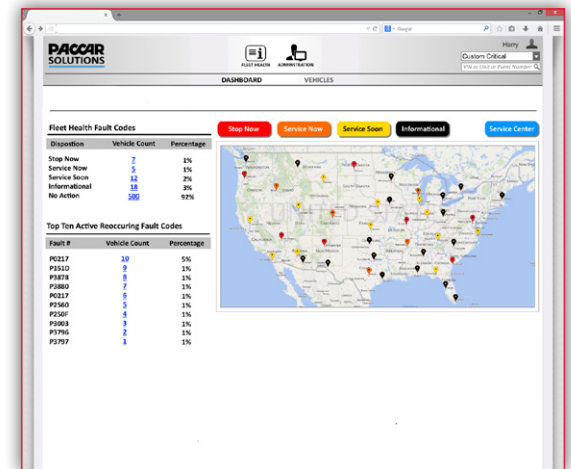

- Instant notification of actionable engine and aftertreatment fault information.
- Fault codes are accompanied by a plain language explanation of the problem and a proposed course of action — immediately empowering the driver and/or fleet manager to make the right decision.
- Proactive diagnostic and repair planning assistance with detailed analysis of critical fault codes — before the truck arrives at the shop.

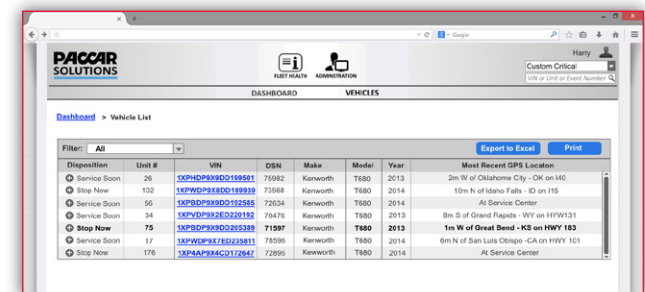

The system generates a comprehensive fault report that can be viewed online or emailed to the fleet manager.

When an engine fault code is triggered, TruckTECH+ notifies both the designated fleet operations manager and designated Kenworth Dealer. The fleet operations manager will have enough information to determine whether to direct the driver to keep driving, or proceed to a Kenworth dealer to be serviced.

The TruckTECH+ web portal provides you with a faster, clearer, more valuable view of fleet operations, showing the status and location of every truck in your fleet.

Detailed reports are readily available on each truck currently presenting an actionable code. You can filter the information by specific chassis, severity, make, model, year it was manufactured and location.
